PS2 Linux News

Introduction/Mission Statement

PS2 Linux Community,

   Greetings, I'm here with a mission to keep you up to date on all the happenings in the PS2 Linux Community. I will keep you up to date and publish new issues when necessary and not on a monthly basis of some sort because I hate long waits just as much as everyone else.

   Well I wanted to push an issue out the door so fast that today will be a one pager. Anyway its been about a year since the Linux Kit came out in the NA and my how far we've come. So many cool little programs keep popping up, from Nofrendo to SauceTetris to interesting patchs like Mr.Browns memory card access. The possibilities are end less with a little elbow greese and some midnight oil to burn. I foresee great ideas and many more interesting programs coming out of this kit and I thank Sony Computer Inc. and its subsidiaries Sony Computer Entertainment America and Sony Computer Entertainment Europe (As you can see I'm using big words to fill the page) for releasing this kit for all of us computer enthusiasts.And the project would survived long without the SCE staff working the site and helping the community out.

                                        -Benjamin Zaidi EIC
